

# Data mining made easy, reproducible and open-source

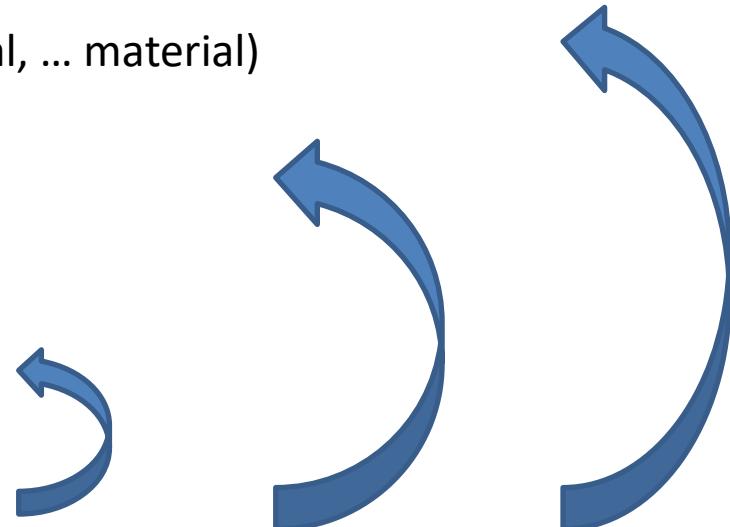

deRSE19 - 2019 June 05

Shany Gefen-Treves & Alexander Bartholomäus

# (Life) Science way of data

The way of data in life science publication process

- *Unknown*
  - Ideas how to answer / clarify / solve *Unknown*
  - Obtain / collect material (biological, physical, ... material)
  - Get raw data
  - Process data
  - Create data collection
  - Ask questions
  - Format / restructure data
  - Visualize data
  - More new questions
- 
- Enough questions answered:  
**Publish and share data and conclusions**

# Reproducibility on the way of data

- *Unknown*
- Ideas how to answer / clarify / solve *Unknown*
- Obtain / collect material (biological, physical, ... material)
- Get raw data
- Process data
- Create data collection
- Ask questions
- Format / restructure data
- Visualize data
- More new questions
- Enough questions answered:  
**Publish and share data and conclusions**
  - make the results usable by the community
  - create reliability and enhance the „correctness“ of the results

# Our need and vision

## Microbiologist need

- Custom data analysis need
- Simple adjustment of plots and parameters

## Bioinformatic vision

- Interactive data analysis
- Simple usage and publishing
- Good review possibility
- Strong reproducibility
- Easy reuse and modification of code and analysis

# R / Rstudio / Shiny

- R
  - Well-known scientific programming language
  - Number 7 most popular programming language (June 2019 PYPL-index <http://pypl.github.io/PYPL.html>)
- RStudio
  - R optimized IDE
  - Intuitive and simple to generate reports
- Shiny (RStudio)
  - R package to enable easy R based web programming
  - Flexible to use (standalone, R markdown, dashboards)

# R / RStudio / Shiny – demo

The screenshot shows the RStudio IDE interface with the following components:

- Top Bar:** File, Edit, Code, View, Plots, Session, Build, Debug, Profile, Tools, Help.
- Left Sidebar:** Go to file/function, Addins.
- Code Editor (app.R):**

```

app.R x

Old Faithful Geyser Data

Number of bins:

1 30 50

1 6 11 16 21 26 31 36 41 46 50

Histogram of x

Frequency

x

The screenshot shows the RStudio interface with a Shiny application open. On the left, the `app.R` file is displayed, containing R code for a Shiny app. The UI section of the app includes a slider for the number of bins, currently set to 30. Below the slider is a histogram titled "Histogram of x". The x-axis is labeled "x" and ranges from approximately 45 to 95. The y-axis is labeled "Frequency" and ranges from 0 to 25. The histogram bars show a bimodal distribution with peaks around 55 and 80.

```

app.R

Old Faithful Geyser Data

Number of bins:

1 7 50

Histogram of x

Frequency

x

The screenshot shows the RStudio interface with two panes. The left pane displays the R script 'app.R' which creates a Shiny application for visualizing the 'Old Faithful Geyser Data'. The right pane shows the generated Shiny app running in a browser window. The app has a sidebar with a slider for 'Number of bins' set to 7. The main panel contains a histogram titled 'Histogram of x' with the x-axis labeled 'x' and the y-axis labeled 'Frequency'. The histogram bars show the frequency distribution of the geyser's waiting time.

# Summary - Biodiversity visualisier

- Share and publish
  - Start locally
  - Publish on managed service
  - Publish on own server
- Interactive analysis
  - No knowledge required to use (may be to interpret) !!!
  - Simple adjust parameters, select sub-groups by clicking
- Reproducibility
  - Technical
  - Data and analysis
- Review, reusage and modification
  - Better review availability
  - Easy to reuse and modify the code or adjust analysis !!!

# My experience using interactive data analysis

+++

- More users get involved
- More answered question
- Faster progress
- Deeper insights

-

- 10-20% more time needed to generate interactivity
- Projects get a bit more complex

# Alternative R/Shiny software stack

- Python
- Dash (plotly)
  - Python based web framework
  - Fast growing community
  - Slightly more programming knowlegde required

Plotly: <https://plot.ly/>

Dash: <https://plot.ly/products/dash/>
